

LIPOSOMAL PRODUCT PORTFOLIO

The Leader in High Performance Ingredients

Liposomes are spherical vesicles composed of a phospholipid bilayer which protects the nutrient from degradation in the gastric system or small intestines. This technology allows the nutrient to cross cell membranes and improves delivery to cells and tissues. The liposome can bind to both water-based and oil-based molecules making it a superior delivery method for vitamins, minerals, and antioxidants.

- | | |
|------------------------------------|-------------------------------|
| Liposomal DHA 25% | Liposomal Melatonin 10% |
| Liposomal Ferrous Ascorbate | Liposomal Multi-Vit & Mineral |
| Liposomal Folic Acid | Liposomal Vitamin B12 5% |
| Liposomal Glutathione 40% | Liposomal Vitamin C 70% |
| Liposomal Hyaluronic Acid | Liposomal Vit D3 50000 IU |
| Liposomal Iron 8.5%, 15%, 20% | Liposomal Zinc 40% |
| Liposomal Magnesium Oxide 32%, 65% | |
